

Beyond

By James J. McGhee IV

So this is what its like
To build a city from the ground
So this is what its like
to scream and never make a sound
so this is what its like
to be a king and wear this crown
I can't take it
You see me falling
For you I'm falling
My heart is drawing
This plan for us
A future speeding
Upon us meeting
Where we're headed
No need to rush

"Cause baby, there's a place inside
my heart confides
with you I'll never have to try
what do I say
it's all so much
should I even wonder why
things happen this way
you never see
the stars beyond the galaxy
it happened to me
and now I'm cast beyond
beyond the broken clouds
beyond the world around
beyond this life
where your heart was found"

So this is why things change
To leave us disregarding all the lives that left us weak
So this is why things change
Decoding all the messages that wouldn't let us sleep
So this is why things change
Popular demand the sex and tricks do they think we're cheap
I can't take it
They see us inching closer
I start kissing around the choker
My heart is drawing closer to you
This future apprehending
All the wasted years descending dies
Our love still spreading
Rapidly across the skies

"Cause baby, there's a place inside
my heart confides
with you I'll never have to try
what do I say
it's all so much

should I even wonder why
things happen this way
you never see
the stars beyond the galaxy
it happened to me
and now I'm cast beyond
beyond the broken clouds
beyond the world around
beyond this life
where your heart was found"
